

MANNY LUZANO

SENIOR FULL STACK ENGINEER

Email: mannyluzano4@gmail.com • Phone: +63 970 150 2287 • Location: Pampanga, Philippines • [LinkedIn](#)

TECHNICAL SKILLS

Languages

JavaScript, TypeScript, PHP, Python, HTML5, CSS3, SQL

Frontend

React, React Hooks, Next.js, Vue.js, Redux, Tailwind CSS, Material UI, Bootstrap, Styled Components

Backend

Node.js, Express.js, Laravel, Django, .NET, RESTful APIs, middleware, request validation, Swagger / OpenAPI

Databases

PostgreSQL, MySQL, MongoDB, relational data modeling, joins, indexes, transactions, query optimization

Cloud & DevOps

AWS, Git, pull requests, CI/CD fundamentals, cloud deployment, monitoring

Architecture

SaaS architecture, API design, scalable web systems, performance optimization, fault-tolerant systems

Engineering

Responsive UI, accessibility, automated testing, peer code reviews, debugging, Agile collaboration

CORE STRENGTHS

- Full-stack product development
- React / Next.js UI engineering
- Laravel & Node.js APIs
- Database optimization
- AWS cloud solutions
- Reusable component design
- Cross-functional delivery

EDUCATION

Bachelor of Computer Science

Pampanga State University

Graduated: July 2015

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 10+ years in the software industry and 7+ years of hands-on experience delivering scalable web applications with React, TypeScript, Node.js, Express, PostgreSQL, Next.js, Vue.js, PHP/Laravel, Python/Django, and .NET. Strong experience owning features across the full software lifecycle, from responsive UI development and REST API design through SQL optimization, testing, deployment, and production support. Experienced with multi-tier SaaS applications, AWS cloud solutions, Git-based collaboration, code reviews, and performance tuning.

PROFESSIONAL EXPERIENCE

TrailerCentral / LeadVenture

Full Stack Developer | Aug 2022 - Dec 2025

- Built and maintained scalable Laravel REST APIs supporting production web applications and business workflows.
- Optimized database queries and backend logic to reduce response times and improve overall application performance.
- Developed and enhanced Vue.js interfaces, reusable components, form workflows, and responsive user experiences.
- Integrated frontend and backend services, handled validation and error states, and supported reliable production releases.
- Collaborated with product, QA, and engineering teams through code reviews, debugging, feature delivery, and ongoing maintenance.

Faye Digital

Frontend Developer | Jan 2022 - May 2022

- Developed responsive Zendesk applications and customer-facing interfaces using React and Next.js.
- Built reusable UI components with Tailwind CSS and modern component-driven frontend practices.
- Integrated frontend features with REST APIs and created Swagger/OpenAPI documentation to improve developer onboarding.
- Improved cross-browser usability, responsive behavior, and maintainability across client-facing applications.

Bushtracks Africa

Full Stack Developer | *Jan 2021 - Apr 2021*

- Developed administrative dashboards, React.js pages, and backend APIs for internal business operations.
- Implemented responsive, cross-browser interfaces and connected frontend workflows to server-side services.
- Added automated tests and supported debugging, code quality, and production-ready feature delivery.

USEFULL (formerly Coffee Cup Collective)

Frontend Developer | *May 2019 - Oct 2020*

- Developed React-based administrative interfaces using CoreUI and reusable component patterns.
- Created responsive UI templates and data-driven screens designed for consistent desktop and mobile use.
- Defined and documented API contracts with Swagger to improve coordination between frontend and backend development.

Upwork / Freelance

Full Stack Engineer | *Mar 2016 - Feb 2019*

- Delivered backend applications and APIs using .NET for a range of client requirements.
- Built full-stack solutions with React, Django, and Vue.js, integrating user interfaces with server-side functionality.
- Developed responsive web interfaces with HTML5 and CSS3 while supporting debugging, maintenance, and iterative client delivery.
